EXPERIENCE

Witbe Inc

New York, NY

Project Manager/Customer Success Manager

June 2021-Present

- Lead and manage 9 projects for customers including Verizon, ViacomCBS and Peacock with the goal of exceeding expectations of success and promoting growth through automation
- Prepare and facilitate 8+ hour interactive training sessions for customers, including 10+ senior executives on delivery of new products and software
- Plan, schedule and execute all software, hardware and system integration with over 100 robots
- Establish growth and generate improvements to customer business by over 40%
- Stimulate progress of each project to meet deadlines and standards with 10+ check-ins per week

Apple Inc

Remote

Software Quality Engineer

February 2021-June 2021

- Automated test cases in Java using Jackson, Jenkins, TestNG and Gradle for over 3000 scenarios
- Engineered a Full-Stack project using React.js and Spring Boot, and one main project which analyzed and verified Apple.com backend data using Java
- Gained fluency in AWS with 40+ hours of training and obtained AWS Cloud Practitioner Certification
- Collaborated with development engineers for code review 1 day a week to propose improvements
- Collected data and devised Confluence reports for weekly team meetings which highlighted progress of software quality testing

Frontend Web Developer

Software Engineer

January 2021-Present

- Coding web applications and integrating CMS driven data, such as Contentful
- Designing and creating user interfaces with modern frameworks including React.js and Next.js
- Developed and deployed 4+ websites for both personal and professional usage
- Completed FrontendMasters Bootcamp and 40+ hours of additional courses including Functional Javascript, Advanced CSS, Computer Science, and Website Accessibility

Projects

Web Development

- studentprofiles.bradbieselin.com - A programming challenge to recreate a site using React.js, with the data implemented from a given API. Displays usage of various Javascript methodologies
- bitcointracker.bradbieselin.com - An animated sunset built with Javascript, CSS, and HTML that tracks the live price of Bitcoin using the Binance.com websocket
- brianna-isola.vercel.app - A personal website project still in progress. Collaborating with another developer to meet and exceed the customers needs using Next.js and Tailwind CSS
